

# Welcome to the Health Care Solutions Corporation

When it comes to your job, nothing is more important to your union health fund than maintaining an excellent health care benefit that covers life's medical uncertainties. It's really all about you and your family members. Your work is very important and not without an element of risk. So your health fund wants to do everything possible to give its valued members the best possible health plan for the least amount of out of pocket monthly expense. To do so, your union health fund needs your help.

As you well know, our national health costs have spiraled out of control. Health funds struggle every day to retain healthcare benefits for their members. And it's not easy! To hold down the cost of insurance premiums, your health fund has contracted with the **Health Care Solutions Corporation** to help in this effort. But without your participation, your health fund saves no money that can be used to offset future health care costs?

## So how can you help your healthcare fund?

### When you or your family members visit the family doctor

Your doctor may order lab work, an imaging procedure (CT, MRI, Ultrasound, SPECT, X-ray) or a cardiology test to check your heart function. You can save your fund money by contacting HCSC at 1-800-655-8125. Having your test performed at a board certified HCSC provider costs your fund a lot less money than using your major health plan insurance card.

### Questions and Answers

**Does using HCSC for my outpatient testing procedure replace my major insurance plan?**

Absolutely not! You may always use your major health plan but this saves no money for your health fund.

**Are the providers different in any way?**

The HCSC providers may be the same provider you are using today.

**Will I have to wait for procedure approval?**

You will need your HCSC authorization number and nothing more. If you are an active member of your health fund, you are preapproved...period! You can even call HCSC from your doctor's office and arrange for your outpatient testing procedure at the HCSC provider nearest your home or work.

**Do I need anything at the testing provider?**

The website also contains your brochure outlining everything you will be required to do. If you cannot print the brochure, your fund office has identical brochures. If you ever need help, just call us. There are no phone directories or annoying wait times. You will not believe how easy it is to use your HCSC health benefits.

**Will this really help to save money for me and our health fund?**

Your participation in the HCSC outpatient testing program saves you and your health fund a great deal of money that can be used to offset future increases in expensive healthcare insurance premiums.

## Outpatient Medical Imaging, Cardiology, Laboratory, and Pathology Testing

Your health and welfare fund has added an outpatient testing component to your general, major medical healthcare plan. When your primary physician orders medical testing consisting of medical imaging (i.e. X-ray, MRI, CT, Ultrasound, Mammography, PET, DEXA, Nuclear Medicine, etc), laboratory, pathology or outpatient cardiac testing, you can now call Health Care Solutions Corporation (HCSC) for a board certified network provider. You will not be obligated to pay any co-pay or member fee not covered under your general healthcare policy. There will be no bills sent to your home asking for a balance due on your account. You can now save significant healthcare dollars for yourself, the healthcare fund and your family members.

**To learn how to use your new cost saving outpatient testing program, please see the reverse side for instructions.**

**Please make certain to remove your HCSC, I.D. cards.**

# How to use your HCSC outpatient benefit

You must have a valid prescription from your doctor. Your doctor orders an x-ray, CT , MRI, ultrasound, mammography , PET, nuclear medicine, EKG, stress test, laboratory tests, or cardiology tests. You are now ready to contact HCSC.

With your your doctor's prescription, you now call HCSC at 1-800-655-8125. One of our agents will assist you with locating a provider facility near your home or place of work. Please have the member's social security number ready.

With your HCSC issued procedure authorization number, you now call the provider to schedule your procedure. That's it! There's no waiting. You can even perform this simple process from your doctor's office. It's that simple!

## Very Important

When you use your HCSC benefit, **DO NOT** give the provider of services your major insurance card. Inform the provider that you are using your HCSC benefit card for your diagnostic service. If you have used the same provider before, tell them you have new insurance. If you give the provider the wrong insurance information, the provider will bill the wrong insurance company. It could cost you and your health fund additional money.
